

GUILLERMO BARBEITO

IT Support | Technical Support | Product Support | Application Support | Technical Operations

Montevideo, Uruguay | gbarbeitor@yahoo.com | +598 98 422 295

LinkedIn **GitHub** **IT Portfolio**

PROFESSIONAL PROFILE

Software Engineer with extensive experience across service desk, technical & product support, product management, and IT operations. I bridge the gap between users and systems: diagnosing incidents, restoring service, documenting solutions, and establishing repeatable processes. Skilled in assisting both technical and non-technical users, prioritizing tasks, automating workflows, and aligning operational needs with development teams.

KEY COMPETENCIES

Support | Service desk, hardware/software troubleshooting, incident management, user support & documentation

Product | Product support, requirements gathering, backlog prioritization, stakeholders, Agile & Scrum

Web / Git | HTML, CSS, JavaScript, Git, GitHub, GitHub Pages & static deployment

Systems | Windows, Linux, system maintenance, backups, migrations & disaster recovery

Automation | Python, scripting, GitHub Actions, Google Apps Script, APIs & workflows

Methodology | Diagnose, mitigate risk, verify results & document handoffs

PROFESSIONAL EXPERIENCE

Independent IT Services
2025 — PRESENT

SOLE PROPRIETORSHIP / ASSIGNMENTS | IT Support · Technical Support · IT Operations

- Providing independent IT services through my sole proprietorship, participating in outsourced assignments, temporary coverage, operational support, and project assistance based on client needs.

Linked companies & organizations: Hemmersbach, GEV, Syngenta, Colgate-Palmolive, RyC Consultores.

Alorica Montevideo
OCT 2024 — AUG 2025

Agent / IT Specialist

- Technical support, troubleshooting, environment and infrastructure configuration and maintenance.
- User assistance, incident diagnosis, and end-to-end resolution tracking.

Tata Consultancy Services
MAY 2023 — MAR 2024

Help Desk Agent / Product Specialist

- Service desk and product support for hardware and software in Windows environments.
- Microsoft and Google tools, documented resolutions, prioritization, and incident escalation.

Tradehelm
2016 — 2018

Product Owner

- Backlog management, requirements definition, prioritization, and tracking of deliverables.
- Coordination between user needs, product goals, and software development teams.

Sabre Uruguay
2012 — 2015

Agent / Product Representative / Product Specialist

- User support, problem resolution, functional consulting, and user training.
- Career progression across customer service and product support roles in an operational environment.

SELECTED TECHNICAL PROJECTS

MENELAO [GitHub]

Python | Tkinter | pytest | SHA-256 | Linux

Non-destructive local application that copies a source to two destinations and verifies the X/A/B triangle via SHA-256 hashes, manifests, and detailed reports.

Foundry companion web [GitHub]

JavaScript | Google Apps Script | State | Authentication | Playwright

Web application featuring independent desktop/mobile views, temporary state, and optional synchronization via Google Sheets and Apps Script with fail-closed authentication.

Jona Logística [GitHub]

Python | GitHub Actions | Data pipeline | Operations | Privacy

Operations hub tracking weather, mobility, and documentation. The weather data pipeline combined multiple sources; upon project closure, personal data and automations were safely removed.

Self-hosted Foundry VTT infrastructure

Windows | Linux | Backup | Migration | Recovery

Operation of a self-hosted environment with decoupled application and data layers, controlled migrations, multi-destination backups, and structured recovery procedures.

EDUCATION

Bachelor's Degree in Software Engineering (Ingeniero en Informática) **2008**
Universidad Católica del Uruguay

COMPLEMENTARY EDUCATION & CERTIFICATIONS

Agile | Agile Fundamentals | Agility Foundations | Scrum | Professional Scrum Master | Agile Testing | Foundations of AI | Project Management

LANGUAGES

Spanish: Native **English:** Full Professional Proficiency (FCE Passed) **Portuguese:** Basic

WORK APPROACH

Understand → Resolve → Verify → Document. Separate symptoms from root causes, select proportional solutions, validate expected behavior and recovery path, and leave sufficient context for clear handoffs.

References and verifiable details available on technical portfolio and public GitHub repositories.
